

Aditya Sairam

Detroit, Michigan | (248) 600-0106 | <https://www.linkedin.com/in/adityasairam/> | adityasairamp@outlook.com

SUMMARY

Software Engineer with 4+ years of experience building and operating production backend and full-stack systems across distributed, data-intensive environments. Strong background in backend engineering, distributed systems, and cloud-native services (AWS, Azure), with hands-on experience designing scalable APIs, data pipelines, and streaming workflows.

WORK EXPERIENCE

Robotics Technologies LLC

Software Engineer

Detroit, MI

Mar 2025 - Present

- Built and delivered a full-stack chatbot application using React and TypeScript with a Node.js service layer and ASP.NET Core backend, improving page load performance by 30% through API and data access optimizations.
- Designed a flexible chat processing flow that supports both deterministic and AI-driven responses, allowing the system to evolve without changes to frontend or client integrations.
- Integrated GPT-4o and Gemini models via Python REST APIs, improving semantic search accuracy by 30% using vector embeddings.
- Implemented a real-time data ingestion pipeline using Apache Kafka and Azure Functions, reducing analytics query time by 35% and improving data availability for reporting.
- Containerized and deployed application services using Docker and Azure Kubernetes Service (AKS), achieving 99.9% uptime and reducing release cycles by 40%.

Cleveland State University

Graduate Research Assistant

Cleveland, OH

Aug 2023 – Dec 2024

- Built data pipelines to process 100GB+ of unstructured text, reducing data preparation time by 40% and enabling faster search and analytics use cases.
- Implemented a distributed processing workflow using PySpark on Azure Data Lake to handle large-scale workloads reliably.
- Developed Python REST APIs to serve processed data to applications, optimizing database queries and response handling to reduce API latency by 25%.
- Improved document search quality by 30% by implementing semantic retrieval workflows used by user-facing applications.

Amazon

Software Engineer

Chennai, India

Jun 2021 – Dec 2022

- Developed and maintained backend services using Java and Spring Boot for Amazon's multi-region data catalog, supporting high-traffic, globally distributed systems and data services.
- Improved backend API performance by 40% by optimizing DynamoDB access patterns and tuning JVM memory management under production load.
- Implemented data validation and consistency checks to ensure correctness across millions of distributed catalog records, reducing data-related issues in downstream systems.
- Built and monitored operational dashboards using AWS CloudWatch, helping reduce incident resolution time and supporting on-call operations for critical services.

Pyramid Software Solutions Inc

Software Engineer

Hyderabad, India

May 2019 – May 2021

- Designed and developed backend services using Java and REST APIs to support recommendation features, delivering real-time personalized results for 10,000+ users.
- Implemented search functionality using Elasticsearch, improving result relevance and reducing query response times to sub-second levels.
- Built automated data processing pipelines using Python, streamlining data preparation and feature generation for internal analytics workflows.

EDUCATION

Cleveland State University

Master of Science in Computer Science

Ohio, USA

SKILLS

- **Languages:** Python, Java, C#, SQL, TypeScript, JavaScript
- **Frameworks:** Spring Boot, ASP.NET Core, Node.js, React.js, REST APIs, PySpark
- **Data & Messaging:** Apache Kafka, Pandas
- **Cloud & Infra:** Microsoft Azure, AWS, Docker, Kubernetes, CI/CD
- **Databases:** SQL Server, Azure Cosmos DB, DynamoDB, Elasticsearch

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate
- Oracle Cloud Infrastructure 2023 AI Certified Foundations Associate
